

# s3 File

This covers how to load document objects from an s3 file object.

```
from langchain.document_loaders import S3FileLoader
```

```
#!/pip install boto3
```

```
loader = S3FileLoader("testing-hwc", "fake.docx")
```

```
loader.load()
```

```
[Document(page_content='Lorem ipsum dolor sit amet.', lookup_str='', metadata={
'source':
'/var/folders/y6/8_bzdg295ld6s1_97_12m4lr0000gn/T/tmpxvave6w1/fake.docx'},
lookup_index=0)]
```
