

# AI21

This example goes over how to use LangChain to interact with AI21 models

```
from langchain.llms import AI21
from langchain import PromptTemplate, LLMChain
```

```
template = """Question: {question}

Answer: Let's think step by step."""

prompt = PromptTemplate(template=template, input_variables=["question"])
```

```
llm = AI21()
```

```
llm_chain = LLMChain(prompt=prompt, llm=llm)
```

```
question = "What NFL team won the Super Bowl in the year Justin Beiber was born?"

llm_chain.run(question)
```
