

Azure

This notebook goes over how to connect to an Azure hosted OpenAI endpoint

```
from langchain.chat_models import AzureChatOpenAI
from langchain.schema import HumanMessage
```

```
BASE_URL = "https://${TODO}.openai.azure.com"
API_KEY = "..."
DEPLOYMENT_NAME = "chat"
model = AzureChatOpenAI(
    openai_api_base=BASE_URL,
    openai_api_version="2023-03-15-preview",
    deployment_name=DEPLOYMENT_NAME,
    openai_api_key=API_KEY,
    openai_api_type = "azure",
)
```

```
model([HumanMessage(content="Translate this sentence from English to French. I
love programming.")])
```

```
AIMessage(content="\n\nJ'aime programmer.", additional_kwargs={})
```
