How to load data from subtitle (`.srt`) files

```
from langchain.document_loaders import SRTLoader
```

```
loader =  
SRTLoader("example_data/Star_Wars_The_Clone_Wars_S06E07_Crisis_at_the_Heart.srt")
```

```
docs = loader.load()
```

```
docs[0].page_content[:100]
```

```
'<i>Corruption discovered\nat the core of the Banking Clan!</i> <i>Reunited, Rush  
Clovis\nand Senator A'
```
