Load multiple urls concurrently

You can speed up the scraping process by scraping and parsing multiple urls concurrently.

There are reasonable limits to concurrent requests, defaulting to 2 per second. If you aren't concerned about being a good citizen, or you control the server you are scraping and don't care about load, you can change the `requests_per_second` parameter to increase the max concurrent requests. Note, while this will speed up the scraping process, but may cause the
