CoNLL-U

This is an example of how to load a file in CoNLL-U format. The whole file is treated as one document. The example data (`conllu.conllu`) is based on one of the standard UD/CoNLL-U examples.

```python
from langchain.document_loaders import CoNLLULoader
```

```python
loader = CoNLLULoader("example_data/conllu.conllu")
```

```python
document = loader.load()
```

```python
document
```
